And local people and professionals have told us...

“It is vital to have social care and health care together.”

“Need to have a balance and ensure you are meeting the needs of both rural and urban communities.”

“I don’t need to go to hospital but having direct access to the GP is necessary. It is very convenient – in the town where I live.”

“Care closer to home? – use other service providers as well GPs ie optometrists, pharmacy, dental – and increase community services.”

“Joined up care is so important – services talking to each other and the patient/carer/family.”
